

Some Dream of a Life Free of Pain BRH Turns Those Dreams Into Reality

What Is the BRH System?

BRH is a groundbreaking system based on therapeutic ultrasound. Innovated in Israel, it won the entrepreneurship prize of Unit 8200, Israel's elite military intelligence corps - equivalent to the US's NSA.

Powered by patented sophisticated algorithms, the system's continuous, penetrating ultrasound waves:

- Activate tissue
- Rehabilitate cells
- Improve blood circulation
- Accelerate lymphatic drainage
- Reduce inflammatory load

In short, one treatment relieves patients from years of excruciating pain, stress and agony.

Immediate, Long-lasting Pain Relief

Unlike opiate or steroid pain relievers, both carrying serious side effects and effectiveness that lasts mere hours, the BRH ultrasound system relieves pain with no side effects, with continuous, long-lasting results. In fact, data from hundreds of cases treated by the BRH system worldwide shows that the **intensity of pain decreases by 66%** on average, after 2-3 treatments.

What does the BRH System include?

- Input point for disposable electrodes
- Smart system for photographing and documenting treatment progress
- Ultrasonic transducer
- Control system and computer

The required treatment regimen is twice a week, 20 minutes per treatment, conducted by a certified staff of therapists.

BRH Treats the Following Pains:

- Diabetic neuropathic pain in soles of feet
- Neuropathic pain in palms of hands (carpal tunnel)
- Secondary pain from chronic wounds

The BRH system has already received the following certifications:

Israel (AMAR)

Europe (CE)

US (FDA)

ISO 13485/2016

Singapore (HAS)

Australia (TGA)

BRH Dramatically Improves Quality of Life

Ilana Zigelman, a regulatory consultant for a medical device company, suffered for more than 20 years from severe wrist pain caused by carpal tunnel syndrome (CTS). Her work requirements involved sitting in front of the monitor for many hours daily, whilst intensively using the keyboard. The wrist pain she experienced during her daily routine steadily increased until it was so intense that she was unable to type, putting her entire professional career at jeopardy.

"After a single treatment by the BRH system, the level of my pain decreased from 10 to 2. Following two more treatments, the pain stabilized at a low level, so that even when perceptible, it does not interfere with my quality of life," says Ilana. "I got my life back. I have no sufficient words to thank the development team of BRH Medical, to whom I owe the existence of this exceptional and life-changing device."

Ilana is only one of hundreds of patients who have joyfully experienced a return to a life without pain.

We invite anyone whose life has been hijacked by severe pain to try a treatment that will return the quality and joy to their life.
